**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, 8-12, and 14, drawn to methods for creating a graphical user interface, classified in class 345, subclass 700.
- II. Claim 3, 13, drawn to methods for composing a document, classified in class 715, subclass 530.
- III. Claim 4-7, drawn to methods for using style sheets to render documents, classified in class 715, subclass 522.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case,

Invention I has separate utility such as creating a interactive display.

Invention II has separate utility such as composing a journal.

Invention III has separate utility such as rendering a document for a Personal Digital Assistant.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
